

Sherry Wilson

Senior Python & Django Backend Developer

Colchester, England, UK | +44 7778 214285 | sherrywilly521@gmail.com | linkedin.com/in/sherry-wilson-python-dev |
Right to work in the UK (Graduate Route visa valid until 2027)

Professional Summary

Senior Python and Django Backend Developer with 3+ years of experience building scalable APIs, asynchronous processing systems, and cloud-ready backend platforms. Proven record of leading a 3-person backend team, supporting systems used by thousands of users, and delivering measurable outcomes including 30% throughput improvement, 25% latency reduction, 30% faster media delivery, and 15% revenue uplift. MSc Artificial Intelligence, University of Essex.

Key Achievements

- Led backend delivery for client platforms including ITC (Classmate), Fabelle, Greencell Mobility (Neugo), and Nippon Paints.
- Improved backend throughput by 30% through asynchronous processing with Celery, Redis, and Flower.
- Reduced system latency by 25% through architecture and service optimisation work across production platforms.
- Supported a 15% revenue uplift through scalable backend architecture for high-profile client solutions.
- Built HLS video streaming pipelines that improved media delivery speed by 30% at scale.

Core Competencies

Backend & APIs: Django, Django REST Framework, FastAPI, Flask, GraphQL, REST API design

Async & Messaging: Celery, Redis, Flower, Kafka, background processing

Cloud & DevOps: AWS EC2, Docker, Nginx, load balancers, microservices deployment

Data & Storage: PostgreSQL, SQL optimisation, ChromaDB

AI & Automation: LangChain, RAG architecture, Gemini, LLM integration, Pandas, Matplotlib

Delivery: Team leadership, mentoring, architecture design, API testing, stakeholder communication

Professional Experience

Senior Python Backend Developer

Deepsense Digital Solutions — Chennai, India | Aug 2021 – Jul 2024

- Led a team of 3 backend developers delivering production systems for ITC (Classmate), Fabelle, Greencell Mobility (Neugo), and Nippon Paints.
- Designed and built scalable backend architectures with Django and Django REST Framework, serving thousands of users across multiple client platforms.
- Built and optimised GraphQL endpoints, reducing frontend-server data load by 30%.
- Implemented asynchronous processing with Celery, Redis, and Flower, improving throughput by 30% and increasing observability.
- Tuned PostgreSQL queries and database flows for stable performance under peak traffic.
- Deployed AWS EC2, Docker, Nginx reverse proxy, and load-balanced infrastructure for high-availability releases.
- Integrated Kafka-based microservices communication, reducing system latency by 25%.
- Implemented HLS streaming with FFmpeg for eLearning platforms, improving media delivery speed by 30%.
- Contributed to a 15% revenue uplift through scalable backend architecture and platform reliability improvements.

Python LLM Developer

AquSag Technologies — India | Sep 2025 – Oct 2025

- Analysed and triaged GitHub issues across open-source libraries to identify high-impact engineering challenges.
- Evaluated unit test coverage and repository quality for LLM performance assessment in real-world bug-fixing scenarios.
- Collaborated with researchers to design issue sets and repositories that effectively tested LLM engineering capability.
- Mentored junior engineers on technical projects and delivery quality.

AI Intern

Victoria Solutions — London Area, UK | Jul 2025 – Aug 2025

- Performed end-to-end data analysis and cleaning with Pandas for AI model training datasets.
- Built Matplotlib-based reporting dashboards to communicate model and dataset insights to stakeholders.
- Prepared large datasets for ML pipelines to improve model-readiness and data quality.

Freelance Python Backend Developer

Self-employed — Kerala, India | Jun 2020 – Jul 2021

- Delivered custom Django, Flask, and FastAPI backend solutions for client projects requiring security, scalability, and clean API design.
- Built Celery and Redis background job workflows to automate client operations and reduce manual processing.
- Containerised and deployed services with Docker across multiple environments.
- Integrated ML functionality into production systems through secure REST APIs.

Selected Projects

Document Assistant API: Built a RAG-powered FastAPI service using LangChain, ChromaDB, and Gemini to answer questions from PDF collections with citation-grounded responses.

HLS Video Streaming Platform: Built adaptive HLS delivery pipelines with FFmpeg, AWS S3, and Nginx-backed serving; improved media delivery speed by 30% at scale.

Multi-Tenant E-Commerce Backend: Delivered Django DRF and GraphQL backend services with Celery, Redis, Kafka, PostgreSQL, and Docker for multi-client retail operations serving thousands of users.

ML Data Pipeline & Dashboard: Automated ingestion, cleaning, feature engineering, and reporting with Python, Pandas, and Matplotlib for AI model workflows.

Education

Master of Science, Artificial Intelligence & Its Applications — University of Essex | Jan 2024 – Jan 2025

Bachelor of Computer Applications, Computer Programming & Specific Applications — University of Kerala | 2018 – 2021

Certifications

- FastAPI — The Complete Course 2025 (Beginner + Advanced)
- Advanced Django
- Full UK Driving Licence

Additional Experience

Team Leader — Welshwood Manor, Colchester, UK | Jan 2026 – Present

Senior Healthcare Assistant / Care Assistant — Care Circle, Colchester, UK | Jul 2024 – Jan 2026

These roles reflect recent UK-based work while continuing to develop backend and AI projects during the transition into the local technology market.
